

THE IYRA CHRONICLE

Grade 5 & 6 · Bi-Monthly Learning Journey

J U N E - J U L Y 2 0 2 6

Curiosity Is Our Compass

A Season of Deeper Learning

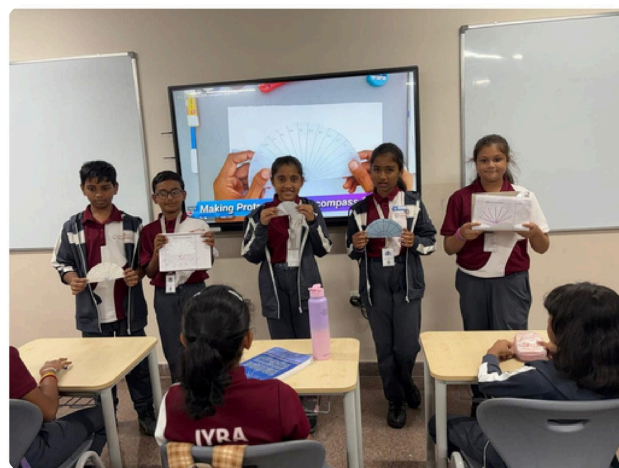

The months of **June and July** marked an exciting phase of deeper learning, exploration and growing independence for the students of Classes V and VI. Academic transaction was conducted as per schedule, and **Clubs were introduced** to bring in skill development. Students engaged with new concepts, challenged themselves to think critically, and participated in experiences that encouraged collaboration, responsibility and purposeful learning. **PA1 tests** were conducted as part of the Assessment of Learning.

ACADEMIC HIGHLIGHTS

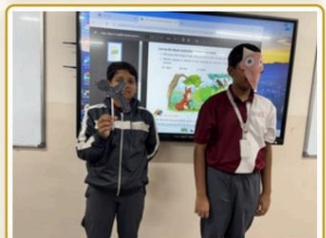

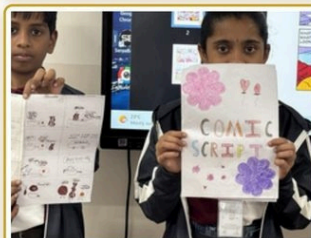

Wit, Words and Wonder

Grade 5. Inspired by the Santoor lesson “Gone with the Scooter,” our storytellers picked up their pens to explore a lesson that matters far beyond the classroom: things that are not ours, do not belong to us. Alongside their stories — of borrowed toys, forgotten bicycles, and missing pencil boxes — they illustrated key moments, turning comprehension into creativity and a moral into a memory.

The Fox and the Raven

Grade 6. From reading to role-play, Grade 6 explored “The Fox and the Raven” through guided reading and comprehension, answering questions on animal traits to sharpen their inferencing skills. Bursting with creativity, they crafted their own fox and raven masks and brought the fable to life through an animated role-play, complete with expressive dialogue and dramatic flair.

ACADEMIC HIGHLIGHTS

Nourishing the Mind & Body

Food is one of nature's most wonderful gifts, thoughtfully provided to keep our bodies strong and healthy. By learning to create wholesome recipes, young students honoured the gift of health and the abundance of nature's gifts — it was delightful to watch curious minds explore healthy recipes and spread awareness about well-being through proper diet.

Soluble or Insoluble?

Class 5 students performed an experiment to test water-soluble and water-insoluble materials. They observed that sugar and salt dissolve in water, while sand, oil and chalk do not — making learning about materials fun and easy!

ACADEMIC HIGHLIGHTS

Does Growth Stop the Flow?

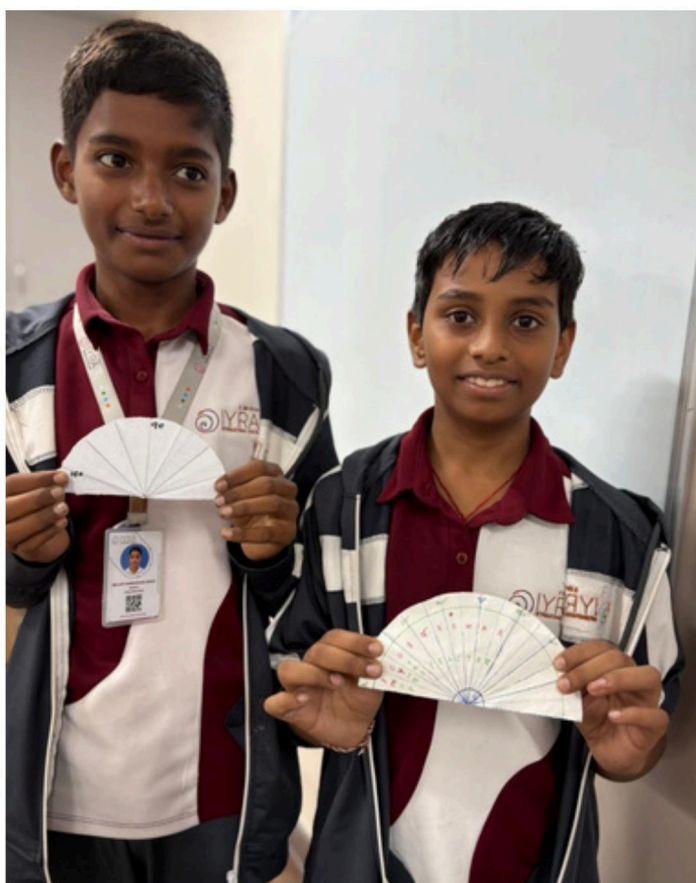

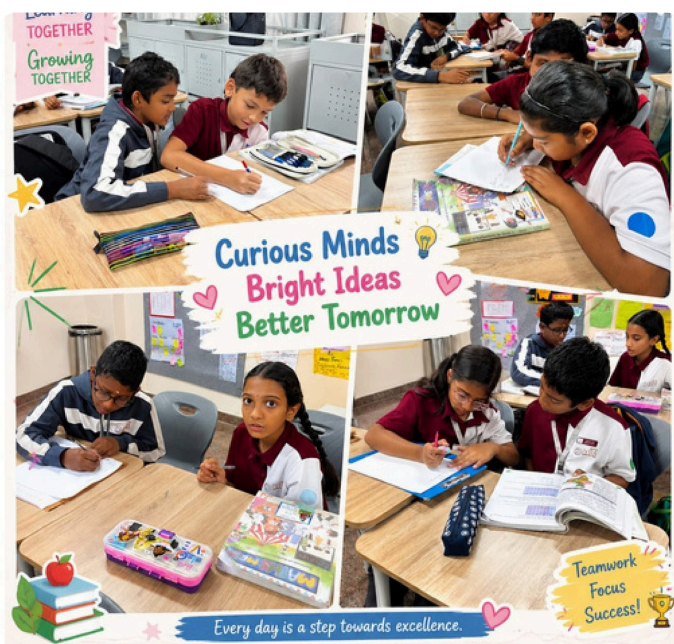

This activity successfully demonstrated that vegetation helps conserve soil by reducing erosion. Students observed that soil with plants allowed slower water flow and produced clearer water, reinforcing the importance of plants in maintaining a healthy environment — a small experiment with a big lesson about nature's balance. Clearer cups of water told the story better than words ever could, showing first-hand how roots hold soil in place and protect the land we depend on.

ACADEMIC HIGHLIGHTS

Maths Magic

Grade 6 students transformed into young mathematicians as they designed and created their own protractors. Through this engaging hands-on activity, they explored the concept of angle measurement while understanding the markings and working of a protractor — a wonderful blend of creativity, critical thinking, and practical learning that made the lesson both meaningful and enjoyable.

SMART Regrouping • Grade 5

Grade 5 students used the **SMART Tool** for regrouping concepts — an innovative teaching framework that helped them develop deeper conceptual understanding by exploring problems from multiple perspectives: **S**imilar patterns, **M**isconceptions, **A**lternative strategies, **R**ight-or-wrong self-checks, and **T**hink & design — fostering creativity and higher-order thinking.

ACADEMIC HIGHLIGHTS

Kannada Corner

Grade 6 children did activities related to their Kannada lesson, 'There is no greater duty than serving our own country.' **Grade 5** students did an activity to show that we can achieve success because of hard work, consistency and dedication.

Hindi Vyaakaran

Students of Classes V and VI learnt grammar through fun and colour. Art integration was used to enhance learning and improve comprehension.

ACADEMIC HIGHLIGHTS

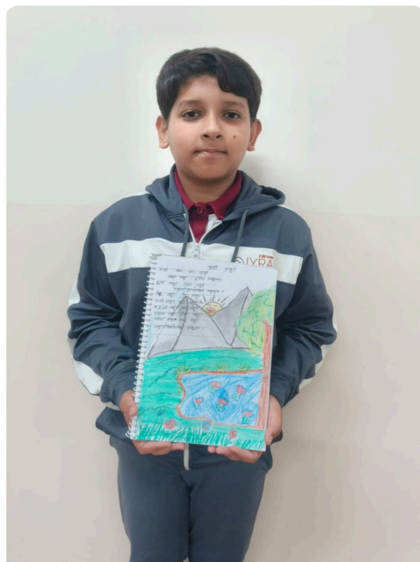

Apprendre le Français

Students went on a virtual tour of France and used art integration to learn concepts in a fun way — discovering culture, communication, and confidence, one word at a time.

Sanskrit • Verse in Colour

A young poet brings Sanskrit verse to life, pairing every line with colour and imagination — proof that classical language can be as vivid as it is timeless.

BEYOND THE CLASSROOM

Fun, Fitness & Friendship

Our students recently participated in an exciting outdoor sports activity filled with energy, enthusiasm and team spirit. The lush green field, the cheer of teammates, and the joy of playing together made the experience truly memorable — building cooperation, communication and the spirit of teamwork that turns a game into a lasting memory.

“Every pass, every goal and every cheer brought us closer as a team. Here's to many more such active and joyful moments!”

BEYOND THE CLASSROOM

In Rhythm, We Grow

Our dance classes are a celebration of creativity, discipline and teamwork. Students groove, express and shine with every step — every step builds confidence, every move builds character. Dance isn't just an activity, it's an expression of life.

MOMENTS TO REMEMBER

Investiture Ceremony

Investiture Ceremony 2026-27 · 18th July 2026 · Early Years to Grade 6.

— A New Chapter of Leadership Begins —

On the **18th of July 2026**, the IYRA turf transformed into a theatre of pride and promise, as our youngest citizens — from Early Years to Grade 6 — were formally invested by our Director Ma'am, Chief Guests, Founder Sir and Chairman Sir, as School Council, House Captains, Prefects and Ambassadors. It was a morning where little shoulders learned to carry big responsibility — and wore it beautifully.

See You In The Next Edition!

As we turn the page to another month of purposeful learning, we celebrate every question asked, every skill sharpened, and every memory made together.

At IYRA, every learner is valued, every effort is celebrated, and every moment is an opportunity to grow, lead and shine.
